Hixson Metal Finishing is a premier processor of metal components for the Aerospace and Defense Industry. With over 85 processes performed in-house (from Anodize to Vacuum Cadmium and everything in between), we are one of just a handful of metal finishers in America that provide the full scope of [“one stop” processing](#) for the A&D Supply Chain. Hixson’s reputation is built on a partnering philosophy with their 3,000+ customers worldwide, big and small. Our vision is rooted in excellence, integrity, and accountability.

Hixson is proud to offer its customers a wide range of [approvals](#) and certifications: ISO 9001, AS 9100 Rev C, AS 9110 (for Maintenance, Repair, and Overhaul), Nadcap (Chemical Processing and Non-Destructive Testing), SEA Certified (for lean implementation), ITAR registered as well as an FAA Repair Station. Additionally, Hixson carries thousands of processing approvals from nearly every Prime and Tier One A&D Company.

Not only does Hixson offer a broad, customer-tailored menu to the Supply Chain, we also demonstrate a keen focus on fiscal responsibility and efficiency. Over the last 6 years, sales are up

nearly 60%, Parts per Million Defects (PPM) has plummeted 75% and continues to trend toward 0, and revenue per employee has increased over 30% even while the workforce has grown 30% and most [pricing](#) has remained the same since 2005. Hixson continues to invest in our future and the future of our customers, most recently launching a brand new, state-of-the-art NDT line in Q3-2012 and targeting the construction of an

upgraded Anodize Line beginning in Q1-2013.

Hixson's award-winning staff delivers more than just superb service...we foster partnership with our mission to revolutionize the metal finishing experience for our customers, our suppliers, and the Aerospace & Defense Industry.
